In 100 Words

An industry-leading time and billing solution, Timeslips by Sage 2010, 5-Station Pack, enables service-based businesses to manage the time and billing cycle efficiently. Easy to learn and use, Timeslips helps professionals to capture time quickly and accurately, leading to greater productivity and increased profitability. The 5-Station Value Pack is ideal for multiple users who access networked data. It integrates with popular accounting software and key practice management solutions as well as Microsoft® Outlook® and Excel®. Timeslips reports present critical information that promotes better understanding of your business. And with improved billing access, Timeslips 2010 is better than ever at turning time into money.

Target Market

Timeslips by Sage 2010, the latest version of the time and billing solution that has been an industry leader for more than 20 years, is ideal for any business that bills for its time, including sole practitioners and small- to medium-sized service firms with multiple timekeepers on a network. Easy to learn and use, Timeslips helps professionals capture time quickly and accurately, leading to greater productivity and increased profitability. Timeslips has remote access options and integrates with popular accounting software like Peachtree by Sage and QuickBooks®, key practice management solutions like Time Matters® and Amicus Attorney®, and Microsoft® Office solutions such as Outlook® and Excel®. While Timeslips can be used by any service industry, it is a leader in time and billing for lawyers and accountants. Timeslips includes a variety of billing arrangements commonly used by legal and accounting professionals, including hourly, contingency, flat fee, percentage of completion, interim billing, progress billing, and more. Timeslips not only improves the billing cycle, but also presents critical information that helps better manage the business.

Why Choose a Timeslips Solution?

Having an effective time and billing system is essential to running a successful service business. To address this need, the first version of Timeslips was developed more than 20 years ago, providing service professionals with an easy way to track time and print bills. Timeslips quickly became a top-selling time and billing software among lawyers and accountants. Today, Timeslips is used in dozens of industries, including consulting, architecture, graphic design, engineering, and many others. In fact, Timeslips has such a complete set of features and customization options that it can be used by almost any business that bills for services.

Timeslips has been specifically designed to help professional service firms improve every step of their billing cycle, capture more billable time and expenses, and get the critical information about their businesses that will help them become more productive and more profitable. By enhancing Timeslips products with mobile time-tracking solutions, electronic billing, and integration with business software, Timeslips is an excellent solution for turning time into money.
